## How do Students submit team-based assignments and project into team folder on NTULearn

1. Go to your class specific site on NTULearn, not main site. The screenshot below shows class 1.
2. Click "Team" in the left panel, and click "Team" in the displayed area.

3. Click your team number. You should see a list of all your team members. Click "File Exchange". Then click "Add File" button, to upload final file(s) to be submitted for grading. There is a time stamp to each file submission. Do not delete or modify any file after the submission deadline.
